

'High milk from forage' Field day

Tuesday 24th May 2016

The C4Milk group invites you to come along and see the results of the Phase 3 trial feeding NO purchased grains currently achieving >25 L/cow/day.

The day will also include discussions on the quality and cost of:

1. White sorghum silage and headlage
2. Silage ensiling techniques
3. Lucerne silage and pasture

This trial aims to push the boundaries by feeding higher proportions of forage in cows' diets to reduce the reliance on purchased concentrates and improve margin over feed cost.

Time: 10:30 – 1.00pm (Lunch supplied)
Venue: University of Qld Gatton Campus Dairy

If you would like any further information, or to RSVP please contact:

Ray Murphy on 0417 622 273/ ray.murphy@daf.qld.gov.au
Please RSVP for catering purposes: Friday 20th May 2016
